Education is what remains after one has forgotten what one has learned in school. Education is the application of what you have learnt to change your life. The law of individual differences makes child-handling methodology different from child to child. However, there are some constants which include highly motivating learning environment, inspirational teachers that are experts in child handling, an integrated co-curriculum to fit local and international contexts, a robust parent-teacher feedback mechanism, a controlled environment at the home front, etc. These and more are the success secrets of GEOANN private schools.

Lastly, the success of any venture in life is highly dependent on how solid the foundation was. At Geoann Private Schools, we provide kids with the rock-solid foundation that would set them on the path to an ultimately successful/fulfilling life.
